# Subject index*

A

Abstracts of papers presented at the sectional meetings of the Association for Research in Ophthalmology, 449, 544, 666

Accommodation, relative importance of parasympathetic and sympathetic nervous systems for, in monkeys (Törnqvist), 612

Accommodative mechanisms, photographic study; changes in lens nucleus during accommodation (Patnaik), 601

Acid, alpha aminoisobutyric, and other amino acids into lens, role of $Na^+$ ions in transport (Cotlier and Beaty), 64

Acids, amino, free, and related compounds, distribution in ocular fluids, lens, and plasma of various mammalian species (Reddy), 478

Adrenergic and cholinergic agents, and their antagonists, effects, at neuromuscular junction of cat extraocular muscles (Sanghvi), 269

Alcohol, retinal:$NAD^+$ oxidoreductase; drug effects on retinol oxidation (Muirhead), 635

vasopressin, and intraocular pressure (Houle and Grant), 145

Amino acids, free, and related compounds, distribution in ocular fluids, lens, and plasma of various mammalian species (Reddy), 478

Amino acids—Cont'd

other, and alpha aminoisobutyric acid into lens, role of $Na^+$ ions in transport (Cotlier and Beaty), 64

Aminoisobutyric acid, alpha, and other amino acids into lens, role of $Na^+$ ions in transport (Cotlier and Beaty), 64

4-Aminoquinoline compound, amopyroquin, effect of long-term administration on retina of pigmented and nonpigmented laboratory animals (Kurtz et al.), 420

Amopyroquin, 4-aminoquinoline compound, effect of long-term administration on retina of pigmented and nonpigmented laboratory animals (Kurtz et al.), 420

Anesthetics and fixation procedures, effect of, regional differences in ultrastructure of rabbit ciliary processes (Wegner), 177

Anhydrase, carbonic, inhibition, normal values and effect; measurement of aqueous humor formation rates by posterior-anterior chamber perfusion with inulin (Oppelt), 76

Announcements, 99, 326, 564, 673

Anomalies, congenital, and systemic diseases; atlas of external diseases of eye (Donaldson) (B. rev.), 456

Applanation tonometer, portable, principle and clinical application of (Draeger), 132

Aqueous humor dynamics, further studies on influence of intraocular pressure on, in cynomolgus monkeys (Bill), 364

on role of monoamine oxidase in regulation, of rabbit eye; enzymology of refractory media of eye (Zeller et al.), 618

Aqueous humor—Cont'd

formation, rate in buphthalmic rabbit eyes (McMaster and Macri), 84

measurement by posterior-anterior chamber perfusion with inulin: normal values and effects of carbonic anhydrase inhibition (Oppelt), 76

Arterial $pCO_2$ and retinal vessel size with oxygen breathing, changes in (Anderson, Saltzman, and Frayser), 416

Ascorbate transport in guinea pig eyes (Becker), 410

Atlas, color, pathology of eye (Barsky) (B. rev.), 455

of external diseases of eye; congential anomalies and systemic diseases (Donaldson) (B. rev.), 456

der Retinopathia Diabetica (Dolenek and Takac) (B. rev.), 455

Augenoperationen unter dem Mikroskop (Harms and Mackensen) (B. rev.), 456

B

Book reviews, 98, 455, 563

Buphthalmic rabbit eyes, rate of aqueous humor formation in (McMaster and Macri), 84

C

Capillaries, radial peripapillary, new observations on (Henkind), 103

Carbohydrate metabolism, enzymes in developing galactose cataracts of rats (Sippel), 59

Carbonic anhydrase inhibition, normal values and effect; measurement of aqueous humor formation rates by posterior-anterior chamber perfusion with inulin (Oppelt), 76

Cataracts, galactose, developing, enzymes of carbohydrate metabolism in, of rats (Sippel), 59

*February, pp. 1-102; April, pp. 103-216; June, pp. 217-328; August, pp. 329-456; October, pp. 457-564; December, pp. 565-686.

Catecholamine content of retina and choroid, influence of light and dark on (Nichols, Jacobowitz, and Hottenstein), 642
Cation, lens, permeability, transport, and hydration, effects of ionizing irradiation on (Lambert and Kinoshita), 624
Cells, aberrant corneal epithelial, produced by ruby laser irradiation (Parr and Fisher), 356
Cellular organization of rhesus extraocular muscle (Miller), 18
Cerebrospinal and intraocular fluids of rabbits, distribution of DMO in; effect of ammonium chloride and probenecid (Constant), 484
Chloride, further study of distribution between plasma and intraocular fluids of rabbit eye (Kinsey), 395
Cholinergic and adrenergic agents and their antagonists, effects, at neuromuscular junction of cat extraocular muscles (Sanghvi), 269
Chorioretinal vascular occlusions with latex microspheres, long-term study; II (Goldor and Gay), 51
Choroid and retina, influence of light and dark on catecholamine content (Nichols, Jacobowitz, and Hottenstein), 642
Ciliary body, sodium ion transport in vitro (Holland and Stockwell), 401
-iris, preparation, rabbit, age variation of iodopyracet and iodide accumulation by (Wälinder), 88
processes, rabbit, regional differences in ultrastructure of, effect of anesthetics and fixation procedures (Wegner), 177
Circulation and structure of retina, studies on effects of osmotically active substances on, Part I. Observations in vivo (Keith, Cunha-Vaz, and Shakib), 177
Part II. Electron microscopical studies (Shakib, Cunha-Vaz, and Keith), 198
Color science: concepts and methods, quantitative data and formulas (Wyszecki and Stiles) (B. rev.), 455
Cornea, autogenous, cranial windows (Kapp and Gills), 518
diffusion kinetics of injected foreign protein from (Sery and Nagy), 207
frog, isolated, ion transport by (Ploth and Hogben), 340
rabbit, in vitro incubation (Mishima and Kudo), 329
symposium on suppression of graft rejection with emphasis on (Hanna) (B. rev.), 563
Corneal epithelial cells, aberrant, produced by ruby laser irradiation (Parr and Fisher), 356
extracts, bovine, proteolytic activity (Anderson), 348
stroma, nonswelling, of shark, relationship between morphology and transparency in (Goldman and Benedek), 574
wound healing, early stages, radioautographic analysis of synthesis of protein, RNA, DNA, and sulfated mucopolysaccharides in (Bracher), 565
Cortical activity, special, effect; studies on visual evoked response (Potts and Nagaya), 657
Corticosteroids, topical, and fungal keratitis (Berson et al.), 512
Cranial windows of autogenous cornea (Kapp and Gills), 518
Cryosurgical techniques in ophthalmology, atlas (Kelman) (B. rev.), 98
Cyclodialysis implants, mode of action in man (Gills, Paterson, and Paterson), 141

D

Degeneration, pigmentary, of retina: early diagnosis and natural history (Sunga and Sloan), 309
retrograde transsynaptic, of inner nuclear layer of retina (Gills and Wadsworth), 437
Diabetes mellitus, vascular complications, with special emphasis on microangiography of eye (Kimura and Caygill) (B. rev.), 455
Diabetica, der Retinopathia, Atlas (Dolenek and Takac) (B. rev.), 455
Diseases of eye, external, atlas; congenital anomalies and systemic diseases (Donaldson) (B. rev.), 456
DMO, distribution in intraocular and cerebrospinal fluids of rabbits; effect of ammonium chloride and probenecid (Constant), 484
fluids of rabbits, distribution of probenecid (Constant), 492
DNA, RNA, protein, and sulfated mucopolysaccharides, radioautographic analysis of synthesis, in early stages of corneal wound healing (Bracher), 565
Drug effects on retinol oxidation: retinal alcohol:NAD$^+$ oxidoreductase (Muirhead), 635
Dynamics, aqueous humor, further studies on influence on intraocular pressure on, in cynomolgus monkeys (Bill), 364

E

Electrical model of human eye, I. Basic model, II. Model and eye during tonography, III. Model and eye during suction cup procedure, and reconciliation with tonography (McEwen, Shepard, and McBain), 155, 160, 171

Electron microscopical studies on effects of osmotically active substances on circulation and structure of retina (Shakib, Cunha-Vaz, and Keith), 198

Enzymes of carbohydrate metabolism in developing galactose cataracts of rats (Sippel), 59

Enzymology of refractory media of eye; on role of monoamine oxidase in regulation of aqueous humor dynamics of rabbit eye (Zeller et al.), 618

Epithelial cells, aberrant corneal, produced by ruby laser irradiation (Parr and Fisher), 356

Epithelial extracts, bovine corneal, proteolytic activity (Anderson), 348

Extracts, bovine corneal epithelial, proteolytic activity (Anderson), 348

Extraocular muscles, cat, effects of cholinergic and adrenergic agents and their antagonists at neuromuscular junction (Sanghvi), 269
- contraction, accommodation, and pupillary constriction, effect produced by stimulation of oculomotor nucleus on intraocular pressure (Jampel and Mindel), 40
- function, role of autonomic nervous system in (Eakins and Katz), 253
- of man, multiple motor systems in (Jampel), 288
- neurophysiology (Bach-y-Rita), 229
- pharmacological studies (Katz and Eakins), 261
- rhesus, cellular organization (Miller), 18

Eye(s), buphthalmic rabbit, rate of aqueous humor formation in (McMaster and Macri), 84
- enzymology of refractory media; on role of monoamine oxidase in regulation aqueous humor dynamics of rabbit eye (Zeller et al.), 618
- guinea pig, ascorbate transport (Becker), 410
- human, electrical model of, I. Basic model (McEwen, Shepard, and McBain), 155
- surgery (Stallard) (B. rev.), 98

F

Fibers, muscle, vertebrate slow and twitch, structure (Hess), 217

Fluids, intraocular, and plasma, further study of distribution of chloride between, in rabbit eye (Kinsey), 395

Fluorescein, use in ophthalmological research (Maurice), 464

Friedenwald Award in Ophthalmology to Dr. David M. Maurice, on presentation (Smelser), 458
- introduction of Dr. Lorrin Riggs (Ogle), 2
- remarks on acceptance (Maurice), 461

Jonas S., Memorial Lecture; electrical evidence on trichromatic theory (Riggs), 6

Fungal keratitis, and topical corticosteroids (Berson et al.), 512

G

Galactose cataracts of rats, enzymes of carbohydrate metabolism in developing (Sippel), 59

Graft rejection, symposium on suppression, with emphasis on cornea (Hanna) (B. rev.), 563

Glaucoma, acute, experimental, pathology of optic nerve in (Zimmerman, de Venecia, and Hamasaki), 109
- open-angle, primary, in "senior citizens," provocative testing for (Ballin and Becker), 126
- symposium on, joint meeting with the National Society for the Prevention of Blindness, 103

Gravis, myasthenia, ocular (Osserman), 277

I

Implants, cyclodialysis, mode of action in man (Gills, Paterson, and Paterson), 141

Intraocular and cerebrospinal fluids of rabbits, distribution of DMO in; effect of ammonium chloride and probenecid (Constant), 484
- fluids, and plasma, further study, distribution of chloride between, in rabbit eye (Kinsey), 395
- of rabbits, distribution of DMO in; distribution of probenecid (Constant), 492
- manometric procedures, mode of action of cyclodialysis implants in man (Gills, Paterson, and Paterson), 141
- pressure, alcohol, vasopressin and (Houle and Grant), 145
- on aqueous humor dynamics, further studies on influence, in cynomolgus monkeys (Bill), 364

Inulin, measurement of aqueous humor formation rates by posterior-anterior chamber perfusion with (Oppelt), 76

Iodide accumulation and iodopyracet, age variation by rabbit ciliary body-iris preparations (Wälinder), 88

Iodopyracet and iodide accumulation, age variation by rabbit ciliary body-iris preparation (Wälinder), 88

Ion, sodium transport, of ciliary body in vitro (Holland and Stockwell), 401
- transport by isolated frog cornea (Ploth and Hogben), 340

Ionizing irradiation, effects on lens cation permeability, transport, and hydration (Lambert and Kinoshita), 624

Ions, $Na^+$, role in transport of alpha aminoisobutyric acid and other amino acids into lens (Cotlier and Beaty), 64

Iris, ciliary body-, preparation, rabbit, age variation of iodopyracet and iodide accumulation by (Wälinder), 88

Irradiation ionizing, effects on lens cation permeability, transport, and hydration (Lambert and Kinoshita), 624

ruby laser, aberrant corneal epithelial cells produced by (Parr and Fisher), 356

K

Keratitis, fungal, and topical corticosteroids (Berson et al.), 512

Kinetics, diffusion, of injected foreign protein from cornea, correction (Sery and Nagy), 207

rhodopsin, and rod adaptation in Oguchi's disease (Carr and Ripps), 426

L

Lacrimal flow, pilocarpine-induced, inhibition and facilitation, by norepinephrine (Goldstein, de Palau, and Botelho), 498

Laser irradiation, ruby, aberrant corneal epithelial cells produced by (Parr and Fisher), 356

Lens cation permeability, transport, and hydration, effects of ionizing irradiation on (Lambert and Kinoshita), 624

nucleus during accommodation, changes in; photographic study of accommodative mechanisms (Patnaik), 601

ocular fluids, and plasma of various mammalian species, distribution of free amino acids and related compounds in (Reddy), 478

Lens—Cont'd

role of $Na^+$ ions in transport of alpha aminoisobutyric acid and other amino acids into (Cotlier and Beaty), 64

Luminous stimulus, recovery in dark following exposure to; validation of indicator of mammalian retinal receptor response (Enoch), 647

M

Maurice, Dr. David M., on presentation of Friedenwald Award in Ophthalmology to (Smelser), 458

publications, 462

Metabolism, carbohydrate, enzymes in developing galactose cataracts of rats (Sippel), 59

Microangiography of eye, with special emphasis on, vascular complications of diabetes mellitus (Kimura and Caygill) (B. rev.), 455

Microspheres, latex, chorioretinal vascular occlusions; II (Goldor and Gay), 51

Midbrain of macaque, nucleus for accommodation in (Jampel and Mindel), 40

Mikroskop, Augenoperationen unter dem (Harms and Mackensen) (B. rev.), 456

Monoamine oxidase, on role, in regulation of aqueous humor dynamics of rabbit eye; enzymology of refractory media of eye (Zeller et al.), 618

Morphology and transparency, relationship between, in nonswelling corneal stroma of shark (Goldman and Benedek), 574

Motor systems, multiple, in extraocular muscles of man (Jampel), 288

Mucopolysaccharides, sulfated, protein, RNA, and DNA, radioautographic analysis of synthesis, in early stages of corneal wound healing (Bracher), 565

Muscle(s), extraocular, cat, effects of cholinergic and adrenergic agents and their antagonists at neuromuscular junction (Sanghvi), 269

multiple motor systems in man (Jampel), 288

neurophysiology (Bach-y-Rita), 229

pharmacological studies (Katz and Eakins), 261

rhesus, cellular organization (Miller), 18

fibers, vertebrate slow and twitch, structure (Hess), 217

function extraocular, role of autonomic nervous system in (Eakins and Katz), 253

Myasthenia gravis, ocular (Osserman), 277

tensilon tonography in diagnosis of (Glaser), 135

N

$Na^+$ ions, role in transport of alpha aminoisobutyric acid and other amino acids into lens (Cotlier and Beaty), 64

$NAD^+$ oxidoreductase:retinal alcohol; drug effects on retinol oxidation (Muirhead), 635

Nerve, optic, human, ultrastructural aspects (Cohen), 294

pathology of, in experimental acute glaucoma (Zimmerman, de Venecia, and Hamasaki), 109

Nervous system, autonomic, role in extraocular muscle function (Eakins and Katz), 253

parasympathetic and sympathetic, relative importance, for accommodation in monkeys (Törnqvist), 612

Neuromuscular junction of cat extraocular muscles, effects of cholinergic and adrenergic agents and their antagonists at (Sanghvi), 269

transmission, fundamental aspects (Nastuk), 235

Neurophysiology of extraocular muscles (Bach-y-Rita), 229

Norepinephrine, inhibition and facilitation of pilocarpine-induced lacrimal flow by (Goldstein, de Palau, and Botelho), 498

Nuclear layer, inner, retrograde transsynaptic degeneration, in retina (Gills and Wadsworth), 437

Nucleus, lens, during accommodation, changes in; photographic study of accommodative mechanisms (Patnaik), 601

for accommodation in midbrain of macaque (Jampel and Mindel), 40

O

Occlusions, chorioretinal vascular, with latex microspheres (long-term study); II (Goldor and Gay), 51

Ocular fluids, lens, and plasma of various mammalian species, distribution of free amino acids and related compounds in (Reddy), 478

myasthenia gravis (Osserman), 277

therapy: complications and management (Leopold) (B. rev.), 98

Oguchi's disease, rhodopsin kinetics and rod adaptation in (Carr and Ripps), 426

Ophthalmological research, use of fluorescein in (Maurice), 464

Ophthalmology, atlas of cryosurgical techniques in (Kelman) (B. rev.), 98

Friedenwald Award in, to Dr. David M. Maurice, on presentation (Smelser), 458

Optic nerve, human, ultrastructural aspects (Cohen), 294

pathology of, in experimental acute glaucoma (Zimmerman, de Venecia, and Hamasaki), 109

Orbital rhabdomyosarcoma, fine-structural classification (Kroll), 531

Osmotically active sustances, studies on effects on circulation and structure of retina. Part I. Observations in vivo (Keith, Cunha-Vaz, and Shakib), 192

Part II. Electron microscopical studies (Shakib, Cunha-Vaz, and Keith), 198

Outflow resistance of intravenous pilocarpine, immediate effect on, in vervet monkey (Bárány), 373

Oxidase, monoamine, on role, in regulation of aqueous humor dynamics of rabbit eye; enzymology of refractory media of eye (Zeller et al.), 618

Oxidation retinol, drug effects on; retinal alcohol:$NAD^+$ oxidoreductase (Muirhead), 635

Oxidoreductase, $NAD^+$:retinal alcohol; drug effects on retinol oxidation (Muirhead), 635

Oxygen breathing, changes in arterial $pCO_2$ and retinal vessel size with (Anderson, Saltzman, and Frayser), 416

P

Paraympathetic and sympathetic nervous systems, relative importance, for accommodation in monkeys (Törnqvist), 612

Pathology of eye, color atlas (Barsky) (B. rev.), 455

$pCO_2$, arterial, and retinal vessel size with oxygen breathing, changes in (Anderson, Saltzman, and Frayser), 416

Peripapillary capillaries, radial, new observations on (Henkind), 103

Pharmacological studies of extraocular muscles (Katz and Eakins), 261

Photographic study of accommodative mechanisms: changes in lens nucleus during accommodation (Patnaik), 601

Pigmentary degeneration of retina: early diagnosis and natural history (Sunga and Sloan), 309

Pilocarpine, intravenous, immediate effect on outflow resistance in vervet monkey (Bárány), 373

Pilocarpine-induced lacrimal flow, inhibition and facilitation, by norepinephrine (Goldstein, de Palau, and Botelho), 498

Plasma and intraocular fluids, further study of distribution of chloride between, in rabbit eye (Kinsey), 395

ocular fluids, and lens of various mammalian species, distribution of free amino acid and related compounds in (Reddy), 478

Pore structure of inner wall of Schlemm's canal (Kayes), 381

Probenecid and ammonium chloride, effect; distribution of DMO in intraocular and cerebrospinal fluids of rabbits) (Constant), 484

distribution; distribution of DMO in intraocular fluids of rabbits (Constant), 492

Protein, foreign, injected, from cornea, diffusion kinetics of (Sery and Nagy), 207

RNA, DNA, and sulfated mucopolysaccharides, radioautographic analysis of synthesis, in early stages of corneal wound healing (Bracher), 565

Proteolytic activity of bovine corneal epithelial extracts (Anderson), 348

Publications of Dr. David M. Maurice, 462

Dr. Lorrin A. Riggs, 4

Pupillary constriction, accommodation, and extraocular muscle contraction produced by stimulation of oculomotor nucleus on intraocular pressure (Jampel and Mindel), 40

R

Radial peripapillary capillaries, new observations on (Henkind), 103

Radioautographic analysis of synthesis of protein, RNA, DNA, and sulfated mucopolysaccharides in early stages of corneal wound healing (Bracher), 565

Receptor response, retinal, mammalian, validation of indicator; recovery in dark following exposure to luminous stimulus (Enoch), 647

Refractory media of eye, enzymology; on role of monoamine oxidase in regulation of aqueous humor dynamics of rabbit eye (Zeller et al.), 618

Regional differences in ultrastructure of rabbit ciliary processes: effect of anesthetics and fixation procedures (Wegner), 177

Retina and choroid, influence of light and dark on catecholamine content (Nichols, Jacobowitz, and Hottenstein), 642

circulation and structure of, studies on effects of osmotically active substances on. Part I. Observations in vivo (Keith, Cunha-Vaz, and Shakib), 177

Part II. Electron microscopical studies (Shakib, Cunha-Vaz, and Keith), 198

pigmentary degeneration: early diagnosis and natural history (Sunga and Sloan), 309

of pigmented and nonpigmented laboratory animals, effect of long-term administration of amopyroquine on (Kurtz et al.), 420

retrograde transsynaptic degeneration of inner nuclear layer (Gills and Wadsworth), 437

Retinal receptor response, mammalian, validation of indicator; recovery in dark following exposure to luminous stimulus (Enoch), 647

vessels, development in rat (Henkind and De Oliveira), 520

size and arterial $pCO_2$ with oxygen breathing, changes in (Anderson, Saltzman, and Frayser), 416

Retinol oxidation, drug effects on; retinal alcohol:NAD$^+$ oxidoreductase (Muirhead), 635

der Retinopathia Diabetica, Atlas (Dalenek and Takac) (B. rev.), 455

Rhabdomyosarcoma, orbital, fine-structural classification (Kroll), 531

Rhodopsin kinetics and rod adaptation in Oguchi's disease (Carr and Ripps), 426

Riggs, Lorrin, introduction on occasion of Friedenwald Award in Ophthalmology (Ogle), 2

publications, 4

RNA, DNA, protein, and sulfated mucopolysaccharides, radioautographic analysis of synthesis, in early stages of corneal wound healing (Bracher), 565

Rod adaptation and rhodopsin kinetics in Oguchi's disease (Carr and Ripps), 426

S

Sampling technique, continuous, for quantitatively measuring transcorneal penetration in vivo (Marzulli, Brown, and Simon), 93

Schlemm's canal, pore structure of inner wall (Kayes), 381

Science, color: concepts and methods, quantitative data and formulas (Wyszecki and Stiles) (B. rev.), 455

"Senior citizens," provocative testing for primary open-angle glaucoma in (Ballin and Becker), 126

Sodium ion transport of ciliary body in vitro (Holland and Stockwell), 401

Stroma, nonswelling corneal, of shark, relationship between morphology and transparency in (Goldman and Benedek), 574

Suction cup procedure, model and eye during, and reconciliation with tonography (McBain, McEwen, and Shepherd), 171

Surgery, eye (Stallard) (B. rev.), 98

Sympathetic and parasympathetic nervous systems, relative importance, for accommodation in monkeys (Törnqvist), 612

Symposium on Glaucoma: joint meeting with the National Society for the Prevention of Blindness, 103

Systemic diseases and congenital anomalies; atlas of external diseases of eye (Donaldson) (B. rev.), 456

T

Tensilon tonography in diagnosis of myasthenia gravis (Glaser), 135

Testing, provocative, for primary open-angle glaucoma in "senior citizens" (Ballin and Becker), 126

Tonography, model and eye during. Electrical model of human eye. Part II. (Shepherd, McBain, and McEwen), 160

reconciliation with, model and eye during suction cup procedure and. Electrical model of human eye. III (McBain, McEwen, and Shepherd), 171

tensilon, in diagnosis of myasthenia gravis (Glaser), 135

Tonometer, applanation, portable, principle and clinical application of (Draeger), 132

Transcorneal penetration in vivo, continuous sampling technique for quantitatively measuring (Marzulli, Brown, and Simon), 93

Transparency and morphology, relationship between, in nonswelling corneal stroma of shark (Goldman and Benedek), 574

Transsynaptic degeneration, retrograde, of inner nuclear layer of retina (Gills and Wadsworth), 437

Trichromatic theory, electrical evidence on; Jonas S. Friedenwald Memorial Lecture (Riggs), 6

V

Vascular complications of diabetes mellitus—with special emphasis on microangiography of eye (Kimura and Caygill) (B. rev.), 455

occlusions, chorioretinal, with latex microspheres (long-term study); II (Goldor and Gay), 51

Vasopressin, alcohol, and intraocular pressure (Houle and Grant), 145

Vertebrate slow and twitch muscle fibers, structure (Hess), 217

Vessel size, retinal, and arterial $pCO_2$ with oxygen breathing, changes in (Anderson, Saltzman, and Frayser), 416

Vessels, retinal, development in rat (Henkind and De Oliveira), 520

Visual evoked response, studies on; effect of special cortical activity (Potts and Nagaya), 657
